

LP[®] TechShield[®] Radiant Barrier Roof Sheathing

The Smart, Simple Way To Build Greener,
More Energy-Efficient Homes

TECHSHIELD[®]
RADIANT BARRIER

BUILD WITH US:

Without LP® TechShield® Radiant Barrier Sheathing

As the summer sun beats down on a home, radiant heat transferred through conventional roof sheathing panels turns the attic into an oven.

With LP® TechShield® Radiant Barrier Sheathing

LP® TechShield® Radiant Barrier Sheathing blocks up to 97% of the radiant heat in the panel from radiating into the attic, reducing attic temperatures by as much as 30°F. This creates cooler rooms below and increases the efficiency of the in-attic air handling system.

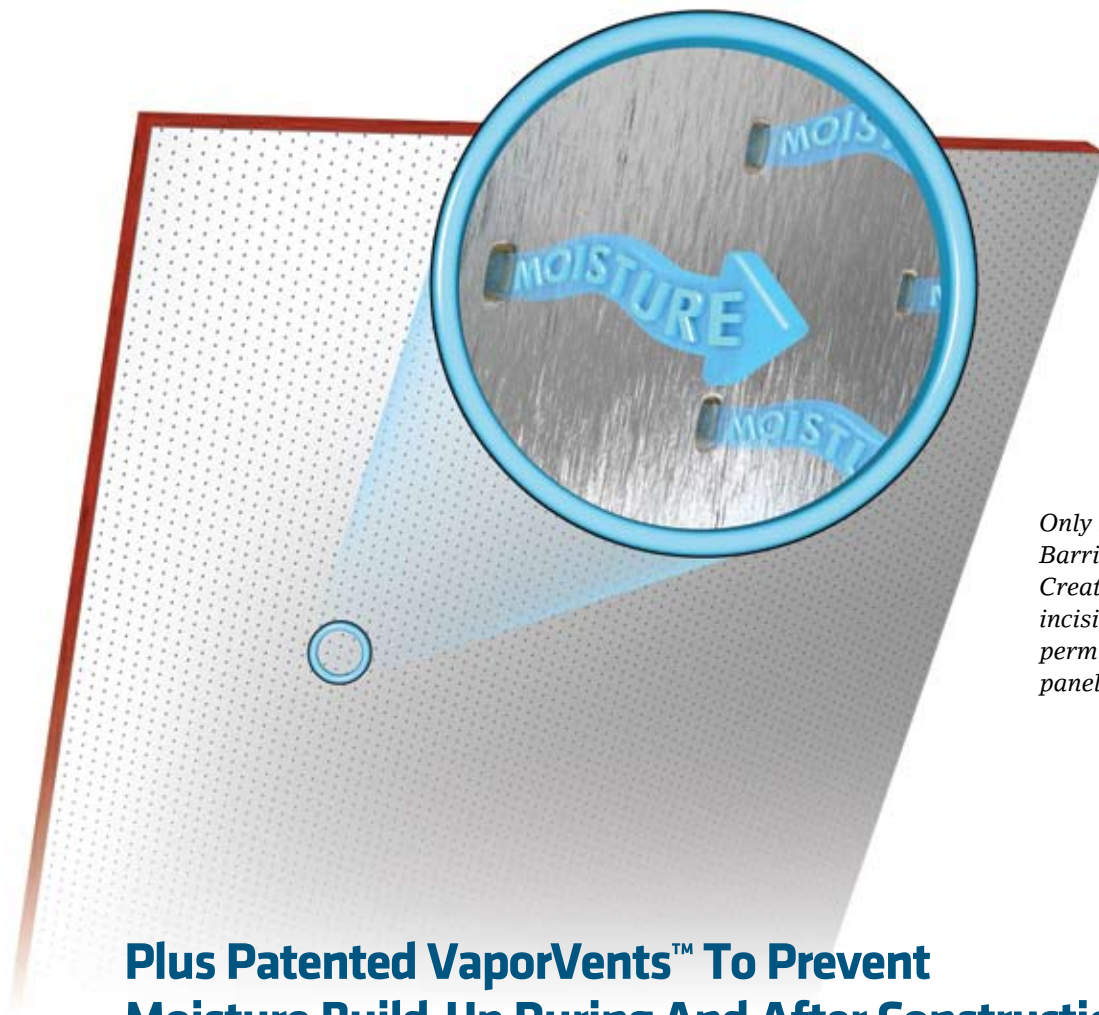

LP® TechShield® Radiant Barrier Sheathing Installs Like Conventional Roof Sheathing...

These days, homebuilders and homebuyers are more value conscious than ever. That's why smart builders rely on LP® TechShield® Radiant Barrier Roof Sheathing. LP TechShield Sheathing installs just like regular roof sheathing, so there are no additional labor costs. But unlike conventional sheathing, LP TechShield Sheathing features a thin, durable layer of aluminum laminated to our OSB roof sheathing. This creates a highly effective radiant barrier.

And Reduces Monthly Air Conditioning Bills By Up To 17%!

Because it helps block radiant heat from entering a home, LP TechShield Radiant Barrier Sheathing can reduce your customers' monthly air conditioning bills by up to 17%. That's built-in savings that start immediately and last for years to come. And an easy way to increase the buyer appeal of every home you build.

Only LP® TechShield® Radiant Barrier Sheathing has VaporVents™. Created with our post-lamination incising process, VaporVents permit trapped moisture in the panel to escape.

Plus Patented VaporVents™ To Prevent Moisture Build-Up During And After Construction

Only LP TechShield Sheathing features VaporVents™. Created with our patented post-lamination foil incising process, VaporVents allow LP TechShield panels to dry from moisture encountered during construction more quickly than other radiant barrier panels. They also allow for continued moisture evaporation after installation. No other brand of radiant barrier sheathing offers this unique, important feature.

All From The #1 Radiant Barrier Brand

The original radiant barrier sheathing, LP TechShield Sheathing has earned the U.S. Government's ENERGY

STAR® certification from the Department of Energy and the Environmental Protection Agency. Over the last decade, LP TechShield Sheathing has grown to become America's

#1-selling radiant barrier brand. That's one more reason to trust the homes you build to this proven performer.

With The “Everybody Wins” Warranty

We back LP TechShield Radiant Barrier Sheathing with an industry-leading 20-Year Transferable Limited

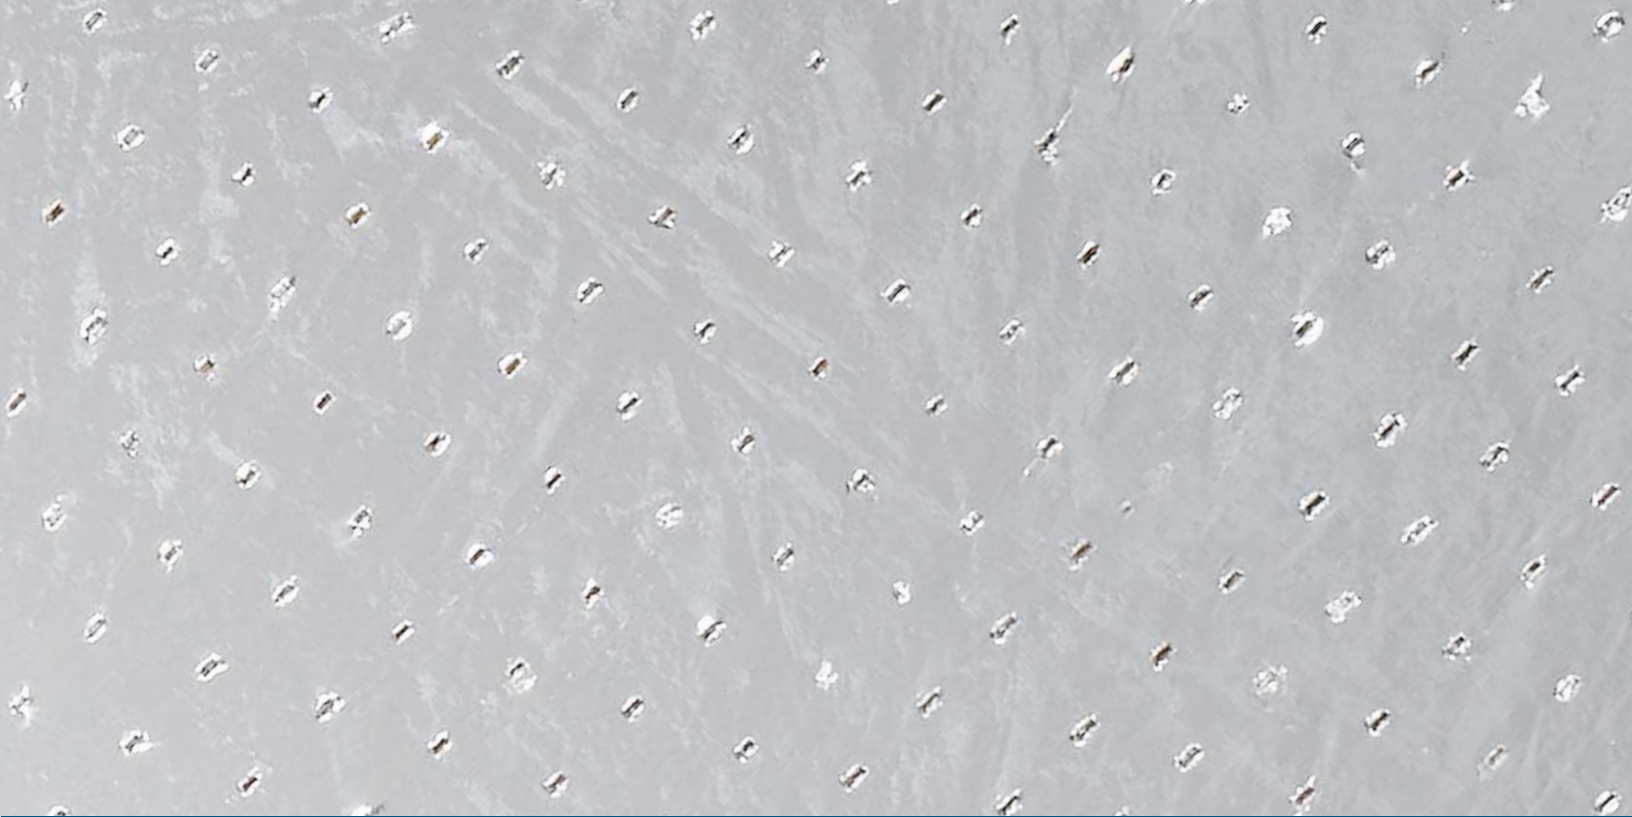

Warranty. So you and your buyer get two decades of peace-of-mind protection.

Choose the smart, simple way to build greener, more energy-efficient homes. Build with LP TechShield Radiant Barrier Sheathing.
